WHOLE HOME ENTERTAINMENT

Videos, Music, Photos and More

IMC - Intelligent Media Client

Breathe media-rich life into every corner of your home with the Intelligent Media Client. Enjoy video, music, photos, and more on HDTV all through this little box. Just connect to the local network and link to the F.Series or iQ ReQuest server.

The Biggest ReQuest Experience Ever

Welcome to the ultimate whole home entertainment experience.

Our award winning music servers are ready to splash your collection of music and pictures across the biggest screens your home theater can handle with our sharp, fast new HDTV interface.

But music is only the beginning. Expand your system with the IMC Intelligent Media Client and your movie collection and millions of online videos join the party.

iQ.IMS - Intelligent Media Server

The Intelligent Media Server (IMS) stores media and controls the entire iQ system. Four built-in hard disk sources allow true flexibility necessary for whole-house control. Dad can enjoy a cigar and some jazz in the den while the kids party by the pool thanks to the intuitive distribution of control via in-wall, tabletop, networked and wireless touch panels. In addition to the four hard disk sources, IMS includes Internet streaming and Finetune sources, and can be equipped to control AM/FM, XM, and Sirius radio, extending your music collection to infinite size. Video, movies, and YouTube™ can be added to the theater and TVs throughout the home with Intelligent Media Clients.

iQ.IMA - Intelligent Multiroom Amplifier

The iQ Intelligent Multiroom Amplifier (IMA) is the powerhouse of the iQ system. With its 12x50-watt array of outputs, it demands nothing less than pure performance from the speakers it drives. Also built-in is an 7x7 matrix switch that allows your ReQuest Intelligent Media Server to control the outputs with no programming or external hardware required. Power up to 42 zones with multiple amplifiers to fill any size home with music.

FREEDOM

This easy and fun handheld touch screen connects easily through your home's WiFi network with zero programming required.

TS.15N

Full color 15" wall mountable or standalone touch screen with webcams, weather, stocks, and full system control via standard Ethernet connection.

iQ.TS35

This 3.5" in-wall controller is the lowest cost touch screen in its class. Available in black, white, and double-sized faceplates - perfect for a retro installation.

iQ.SCK

Serial Connection Kit for integrating radios and multiple IMA amplifiers into the iQ whole house music system.

iQ.NIRE

Network IR Extender for connecting satellite TV tuners, cable boxes, and CD changers to your iQ system.

THE INTELLIGENT MEDIA SYSTEM

Weather, Stocks, Webcams

F.Series - The Center of Your Musical Universe

Available in two and four zone configurations, F.Series is the perfect choice for the majority of home installations. The F.Series features multiple audio outputs from a single unit, allowing family members to listen to different songs in different rooms of the house. Add an Intelligent Media Client for movies and video.

N.Series - Your Music Your Way

The single zone N.Series is the perfect introduction to the world of ReQuest music servers. From a hip studio apartment to a stately colonial, there is an N.Series model that fits every budget and music collection. With models capable of storing up to 1,200 CDs, music collections can grow without worries of exhausting storage space.

MEDIA SERVERS

For Music and Movie Fans

TS.15N

15" Network Touch Screen

The TS.15N 15" touch screen provides complete 2-way interactivity with the ReQuest systems. The TS.15 touch screen introduces breakthrough music experiences that are both visually exciting and intuitively designed. It will positively change the way you listen to your music. Connects via Ethernet and can be placed anywhere in the home.

The TS15N with wall mount

Serious Play Media Manager

Serious Play Media Manager is an intuitive drag-and-drop experience that gives you the power to navigate your music collection with the touch of a finger. Exploring your entire collection is made simple with comprehensive album art displays and touch screen control.

NetSync™

NetSync is patented ReQuest technology that synchronizes your music collection from your home unit to your office, your summer vacation home, and even your yacht. Syncing from one room to another in your home, or across the Internet to your villa in Tahiti is simple with ReQuest's NetSync technology.

MyReQuest

With My.ReQuest.com, accessing your music anywhere in the world is as easy as typing in a web address. Connect to your ReQuest server with any web browser and listen to your favorite music in your hotel, while traveling, at the office, and even on your notebook at the local Starbucks. No matter where you go, your collection is available to you.

Classical Music Mode

For classical music enthusiasts, ReQuest's Classical Music Mode Service makes it easy to manage, find, play, and enjoy classical collections. Search by composer, conductor, orchestra or performance. You can even hit "shuffle" without fear - Classical Music Mode won't break up a performance.

NetSync for iTunes

NetSync for iTunes synchronizes songs, playlists, and metadata between multiple iPods and your ReQuest server. Use iTunes on your computer to add music, update metadata, and create playlists. The changes are also made on the ReQuest server and are available throughout the entire house. NetSync for iTunes utilizes the ReQuest Automatic Dual Encoding (ADE) engine ensuring the highest fidelity music files are automatically played for home listening and a second optimized version is used on the iPods or iPhone. Available on the PC and Mac.

Finetune

Hundreds of commercial-free stations add millions of songs to your collection instantly with this premium Internet streaming service. Create your own playlists and control the experience from any touch screen in the house.

ReQuest Webserver

Now you can have complete control over your music collection right from your computer - whether you are in your family room or Paris. Utilize the Serious Play drag-and-drop interface, add music and even upload songs from iTunes for your distributed music system right from your Mac or PC.

Only **ReQuest** can bring it all together
